The Executive Secretary wanted to address a situation that is not part of her report. She asked the Chairperson if she could address the issue. The Chairperson allowed the Executive Secretary to voice her concern.

The Executive Secretary stated that on two occasions and most specifically this evening, Ms. McNamara has made false allegations against her. She further explained that the Board of Selectmen asked her to schedule a meeting with the Board of Assessors, Gary Brackett, and Karin Furno that is scheduled for Wednesday evening. The Executive Secretary is frustrated that she cannot do her job when things are being fabricated and false accusations are being made. She wants to know what the Board of Selectmen is going to do about this situation.

The Chairperson chose to step down from the discussion.

The Vice Chairman took over and stated that the Board of Selectmen needs to address these issues with the Board of Assessors. Selectmen Savage hopes that the liaison will follow up with this. The liaison has the right to use legal counsel if she feels it is needed. At a Board of Selectmen meeting, all were in agreement that she could use legal counsel. The Executive Secretary clarified that there was no vote taken; there were only two members present, and Selectman Savage stated that the Executive Secretary was asked to make an executive decision on behalf of the Board of Selectmen.

Selectman Petrowicz feels that by providing a liaison is offering an extra person to any board to assist with communication and providing information back to the Board of Selectmen. He feels that there are some agenda driven issues. He doesn't want or like this. He feels that if someone has issues they should call ethics and air your concerns and use the resources that the State offers. He does not want anyone accused or harassed. Selectman Savage further explained that there is no witch-hunt and the Board of Selectmen is validating departments.

The Executive Secretary stated that over the last 18 months, she has had requests to send copies of documentation to ethics, and this is exactly what has been requested and done but she did not notify ethics about this situation.

The discussion was turned back over to the Chair.
