## Community Narcan Distribution Program

Your local Board of Health is committed to the prevention of overdose deaths. Nearly 40% of overdose deaths occur while a bystander is present. By providing Narcan to those in need, you can help save a life.

Please contact your local Board of Health for information on free trainings on the use of Narcan or to obtain a free Narcan kit.

Each kit contains two doses of Narcan, fentanyl testing strips, instructions on the use of each of these items, as well as a valuable resource guide.
