

The building permit fee is determined by the **VALUE** of the construction project.
The value is determined by multiplying the **Construction Cost X square foot**.
Then that dollar amount is divided by 1000 then multiplied by \$9.00 for total permit cost.

EXAMPLE: Garage is 576 sq. ft. X \$70.00 per sq. ft. = \$40,320.
Then divide by 1,000 = 40.3. Then multiply 40.3 x \$9.00 = \$362.70 **cost of permit.**
